

**Finer. Thinner. Sharper.**

# New Premium Liners

Cheyenne presents: The new premium liners - redefining precision

With a total of 37 new liner configurations - 16 capillary liners and 21 safety liners - Cheyenne is entering a new era of liner needles. Developed with the clear aim of meeting the increased demands of tattoo artists worldwide, these new liners set new standards in terms of sharpness, precision and line guidance.

## What's new?

The new liners are not just an update - they are a fundamental development. Every aspect has been rethought and optimised to significantly increase quality and precision:

- Longer tapering: Extremely sharp single needle for precise lines and finest details.
- Tighter soldering: Tighter soldered needles for a more precise stitch pattern and maximum control.
- Shorter soldering length: Minimal distance to the point for maximum stability and clean lines.
- Direct piercing behavior: Controlled, gentle piercing - like "butter in the skin".
- Finer line width: Narrower lines - e.g. a 7-liner looks like a classic 5-liner.
- More control & pigment density: Higher pigment concentration, less spatter, better ink flow.

Sales start July 2025
