

From heritage to future

HAWK Pen 2

In 2014 the HAWK Pen changed the world of tattooing with its ergonomic pen-style shape.

Now it's time for the HAWK Pen 2.

It follows the award winning design that guarantees comfort during long sessions with different possible grip variations. Bigger, smaller, heavier...it's the artist's choice. The even stronger BLDC motor can now be run in Steady and Responsive Mode and the display clearly shows the needed information. The frequency in Volts or Hertz, the motor mode and the battery status. All you can expect from a modern rotary machine with all the experience from the original HAWK Pen.

HAWK Pen 2 in detail:

- Stroke: 3.5mm
- Maximum freedom through cordless operation
- 2 Operating motor modes: Steady mode (hit/frequency: constant) and Responsive Mode (hit/frequency: reactive)
